Do-Luck kit, House of Kolor paint and over 300bhp put Dan's R32 to the top of the Max Motors pile

**DAN** NISSAN SKYLINE R32 GTS-t

**O** I YOU LOT, STOP drooling or you'll look like a bunch of window lickers. I know my R32's got the most gorgeous paint job you've ever seen, but if you don't put your tongues away you're gonna trip over 'em and look like prize plonkers. It's totally understandable if you're a bit stiff in the pants

department, though, 'cos when Kevin and the gang from Avon Custom Engineering (01934 830188 or [www.avoncustom.co.uk](http://www.avoncustom.co.uk)) delivered my baby to *Max Power Live* 2003 I was as stunned as a nun with a knob up her bum. The House of Kolor paint is so deep it's dangerous for

even the most proficient of swimmers and that dark blue-to-purple flip suits the Do-Luck-kitted 'Liner sooo sweetly it should've come from the factory. And it's all down to the spray-gunning skills that flow from Avon Custom's workshop near Bristol. Not many bodyshops can use

these wild American colours and boss man Kev's 25 years' experience in the paint booth fully shines through here. The Avon team are well up for some serious modding jobs, so if you've got some crazy cool plans in mind be sure to give 'em a call. Now wipe that drool off your chin.

**“WHEN THE SKYLINE TURNED UP AT MAX POWER LIVE, I WAS AS STUNNED AS A NUN WITH A KNOB UP HER BUM”**

• Spent this month - £4700 including paint  
• Coming soon - monster alloys
